# Duana: The soft alternative

## A perfect match: Fripa Duana®

The requirements for modern hygiene paper are constantly changing, and solutions are needed that combine quality, resource utilization, and price awareness. Fripa Duana® addresses precisely this issue by combining fresh cellulose fibres with high-quality recycled fibres.

Both types of fibre are combined to create a bright white, soft, and pleasantly gentle hygiene paper. The fresh cellulose fibres provide stability, volume, and a particularly pleasant feel on the skin, while the recycled fibres are a resource-saving and responsible addition.

**Material mix:**  
Pulp and recycling

### Soft, clever, bright white Duana® toilet paper

Fripa Duana® represents a soft, budget-conscious alternative in the entry-level segment – thanks to a clever mix of materials.
