

FRIPA

Hygienepapier heute.

**Product catalogue
paper products**

The heart of hygiene concepts

Fripa offers a versatile and high-quality hygienic paper range, which spans from delicate toilet paper, handkerchiefs and paper towels to high-performance cleaning, household tissues and couch rolls. Via professional retail, these Fripa products are used in the away-from-home segment of the professional hygiene supplies industry.

Washroom

When hygiene plays the main role | from page 8

In the washroom and all other sanitary areas, Fripa combines hygiene and comfort. We place great emphasis on high-quality materials, from the entry-level segment right through to our premium products.

Healthcare

No compromises on health issues | from page 22

The healthcare sector is a broadly diversified field. In many cases, Fripa tissue paper becomes a silent helper. Whether as a hygienic patient pad or simply for blowing your nose. Diagnosis: A case of safe hygiene.

Workplace

A clean affair | from page 30

Hygiene is a decisive factor for customer satisfaction, not only in commercial cleaning and the catering industry. Many employees, regardless of their job and sector, also value a clean working environment.

Fripa products for the workplace are universally applicable and impress with proven, professional performance.

There for the public

Public hygiene depends on the quality and reliability of simple but important products. Fripa meets this general requirement with a well-rounded range of hygienic papers and the corresponding accessories.

Rising expectations

Fripa meets these needs with high-quality maxi-roll toilet paper, which, when used in conjunction with functional dispenser systems, offers an efficient and hygienic solution for high-traffic washroom areas.

Toilet paper jumbo rolls

Fripa toilet papers are developed and produced in such a way that they always combine maximum softness and stability in their respective categories with a quality, which you can simply feel.

The basics of towel paper fold formats

Paper towels are not only available in different numbers of plies and sheet sizes, but also in different fold formats. The fold indicates how the papers are bundled or inserted into the dispenser.

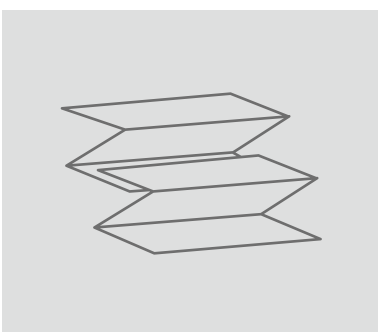

V-fold towels

The paper towels are folded once in the middle like a 'V'. The resulting paper halves interlock with the preceding and following paper towel folds. This means that when one towel is removed, a new towel is dispensed for the next user. This type of fold is also known as a zigzag fold or, in abbreviated form, a Z/Z fold (ZZ fold).

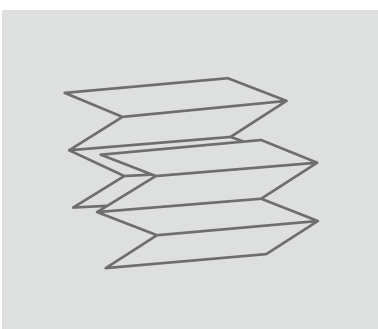

C-fold towels

The paper towels are folded twice. The folded sides are aligned in the same direction, similar to the letter 'C'. With this type of fold, the towels are not connected to each other and therefore do not get caught up in each other. The folded towels are placed in the dispenser with the open side facing downwards. This means that after a towel has been removed, the short sides of the next towel stick out downwards and can be easily removed from the dispenser opening. This type of fold is also known as a layer fold.

Z-fold towels

With Z-fold paper towels, each individual towel is folded twice, giving it a 'Z' shape. The last flap of one sheet fits into the first flap of the next sheet, so that when one towel is removed, the next one is ready to hand from the dispenser.

W-fold towels

There are also so-called W-fold towels, in which each individual towel is folded three times, giving it a 'W' shape. Here, the last two folds of one sheet overlap the first two folds of the next sheet, so that when one towel is removed, the next towel is ready to be taken from the dispenser.

Fripa paper towel rolls

Practical towel rolls made from 100% chlorine-free bleached cellulose or recycled tissue for daily hygiene in the washroom.

Healthcare

Fripa also offers numerous products for a wide range of applications in the healthcare sector. Fripa couch rolls are extremely tear-resistant, durable and yet pleasantly soft.

Handkerchiefs and cosmetic tissues are not only used in doctors' surgeries, hospitals and laboratories, but are also important everyday companions.

Fripa couch rolls

Fripa couch rolls are tear-resistant and waterproof, ensuring daily hygiene in clinics and practices. The 2-ply duo-line+ and secura-line variants are individually wrapped for optimal protection.

Fripa couch rolls

When maximum hygiene is essential: the paper used for couch rolls must be extremely tear-resistant, durable and pleasantly soft, as it comes into direct contact with patients' skin.

Workplace

In the professional sector, Fripa cleaning papers are sophisticated and strong partners that can be used universally. In addition, Fripa offers tear-resistant and highly absorbent household towels, which are ideal for everyday use.

With their extremely stable fibre structures, contemporary embossing and pleasant-feel surfaces, they are perfectly equipped for all challenges.

Fripa cleaning rolls

In industry and trade, but also in modern office environments, machines, equipment and rooms must be cleaned to a particularly high standard. Fripa cleaning rolls can withstand extreme demands thanks to their enormous tear resistance.
